

ATHENA WEAPONS DETECTION SOLUTION

This System Supports Homeland Security's Necessary Processes and Controls

Inspired by the Department of Homeland Security's (DHS) best practices, Athena's news software suite goes beyond traditional weapons detection to ensure adherence to process.

DHS 8.2 Testing and Documentation with WDS

Emphasizes the criticality of regular WDS (Weapons Detection System) testing and documentation to ensure optimal performance and reliable threat detection.

DHS 8.5 Secondary Screening Procedures AI Patented: Secondary Assistance Check.

Key Requirement: DHS 8.5 mandates well-defined secondary screening protocols for individuals who set off WTMD/WDS (Walk-Through Metal Detector/Weapons Detection System) alarms, ensuring thorough security measures.

DHS 14.2.1 Illegal Items - Notification Procedures

Core Requirement: DHS guidelines state that "screening procedures should specify that the discovery of illegal items should immediately prompt notification of supervisory staff."

DHS 14.2.2 Prohibited Items Log.

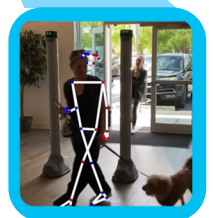

Assures that officer submit structure information with evidence customizable input form to DHS testing and documenting with WDS.

Athena's Real-Time Alerts empower your security team to comply with this requirement seamlessly.

Benefits

Beyond Security: Benefits for Your Organization

- **Compliance Assurance:** Demonstrate due diligence in adhering to DHS best practices.
- **Legal Safeguards:** Rigorous documentation of secondary screening procedures helps mitigate potential liability.
- **Quality Control:** Data insights enable continuous improvement of screening protocols and officer training.
- **Visitor Experience:** Consistent, well-executed procedures create a smoother and less intrusive screening process.
